

About SafeTagID !

SafeTagID is a **New Patented Identification ID Tag** that will give you that extra peace of mind for whatever it is that you hold dear and valuable – such as **keys, luggage, objects, pets** and **even human health**. **Wherever they are, and whatever happens, SafeTagID will be your last line of defense against avoidable loss.**

Lifetime Service

SafeTagID will be a valuable investment that insures your property, loved ones, and medical information for life. Whether you experience a medical emergency tomorrow or little Sparky runs away 5 years from now, **SafeTagID will always be available to inform and notify you in the spot.**

Superior Communication

If someone finds your asset or property, how can they contact you?

SafeTagID will give you the widest tracking range of communications on the market, covering all bases and maximizing the chances that your property is swiftly returned.

If someone visits your profile either online or by mobile upon finding your **SafeTagID**, you will receive an email alert every time with the geo location of where this request has been accessed (if their GPS is enabled and they accept to share their location).

Scan Technology

Every **SafeTagID** tag will come with a unique laser grade QR Code, which (much like a barcode) can be scanned to show your **SafeTagID's** profile page, containing any information or contact details that only you specify to be seen.

Online/E-mail

Can't scan? The finder of the tag ID will also see the profile page by manually typing the tag ID at **SafeTagID**. Therefore, an e-mail or SMS notification will be sent to you by the finder.

SMS Texting

No internet either?

Our text messaging system will also allow the finder to notify you by SMS texting the word SAFETAGID to the number 76000. **It will be that easy!**

24/7 Hotline

The **SafeTagID** 24/7 Telephone Hotline will be available as a last resort to make contact to a live operator from **SafeTagID**, and get that property returned to you right away.

You will also be able to call our worldwide toll-free number (1-800) where you can leave a message with your name, how to be contacted and the tag ID so that the owner or our staff can contact you within minutes.

Simply the best system to recover your personal items.

SMS and E-mail alerts work worldwide.

Protection like never before.

SafeTagID: Never Lost!
