

Design Kit V2 - Whats new and improved?

When we set out to update the very popular Musegrid Design Kit we decided to go through every single item with a fine-toothed-comb. So that's what we have done. Here is a comprehensive list of all the improvements made.

Updates Made:

1. Updated starter file.
2. New color scheme for the Style Guide. A new color scheme that better represents the wire framing idea.
3. Updated breakpoint maker with new device type breakpoints.
4. Typography improvements. Small changes to the style guide typography paragraph style to improve the aesthetics of each pattern.
5. Element placement cleanup: This including reviewing and refining every pattern.
6. New color scheme for the Style Guide. A new color scheme that better represents the wire framing idea.
7. Updated Versioning Numbering e.g., 2018.02.19
8. Updated text frame technique (What does that mean?)
9. Split design kit into further pattern updates - makes updates quicker and imports faster.
10. Replaced old Muse widgets with new Muse widgets.
11. Added three new patterns.
12. Updated pattern guide.
13. Overhauled navigation menu and added sub-menus.
14. Added 3 page layout examples using design kit.

Navigation Patterns

1. New **Navigation One 1 with sub-menus** - added sub-menus to desktop and mobile menus with embed graphic and paragraph styles.

Content Patterns
