## Biography

I am a UX/UI Designer with an engineering background, a problem solver at my core, always looking for the next challenge. Combining the technical and the creative to create an all-encompassing user experience. Currently seeking a full-time Product Design or UX/UI design position.

## Experience

### UX/UI Designer

**Athlon Toronto** July 2019 - January 2020

Worked to design concept work, low-high fidelity wireframes, and branding. I contributed technical research and created product requirements for various projects. Used Webflow to take final designs into the development phase and focused on prototyping and micro-interactions.

### UX/UI Designer

**Smooth Commerce** April 2019 - July 2019

Produced high fidelity designs for quick serve restaurant apps and created branded style guides. I introduced Abstract to the workflow and helped to streamline the design to developer handoff process.

### UX/UI Designer

**RED Academy** October 2018 - March 2019

Worked as a designer for 6 community partner clients. Created high fidelity designs for client web pages and apps. I was the design lead for 3 projects and worked with the clients as a project manager as well.

### Software Specialist

**Cimcorp Automation** June 2016 - December 2017

Provided software support for robotics systems. Created product testing procedures, documentation, and rolled out upgrades.

## Education

### B.Eng Mechatronics Engineering & Society

**McMaster University**

Graduated 2016

### UX/UI Designer Professional

**McMaster University**

October 2018 - March 2019
