VIERCORP BUSINESS MODEL

Our business model has two dimensions aligned to **how we create value and equally importantly, how we run our business.**

We create value in two simple ways. We own and operate the company. We invest in global emerging market through our selected strategic investment, strategic acquisitions and New Ventures. By investing in the infrastructure and logistics sectors in emerging countries, Viercorp seeks to take advantage of growing economies and lucrative sectors within them. For example, capital spent to build ports, ships, creates jobs, and improves logistics while having a positive ripple effect within each country and region.

Our approach to running our business reflects the most material issues for our continued success and delivery of our business plans. These include strong and effective risk management, governance, transparency and anti-corruption, developing a multi-disciplined and diverse entrepreneurial team and making a positive and lasting contribution when we operate.

We provide liquidity to investors who have invested in private investments and need for some reason to sell those investments and make their cash work for them someplace else.

Leadership Direction requires you to provide direction to members of your team. You will also motivate and support them to achieve their personal objectives and those of the team. You will be required to win the trust and support of your team and steer it through periods of change or conflict.

- You will be expected to
- Create a sense of common purpose
- Take personal responsibility for making things happen
- Encourage and support others to take decisions autonomously
- Act within the limits of your authority
- Make time available to support others
- Show integrity, fairness and consistency in decision-making
- Seek to understand people's needs and motivations
- Model behaviour that shows respect, helpfulness and co-operation (*Continue*)
