

Self-Portrait in the Style of Andrea Constantini

We will take your portrait in the classroom photo studio. **Before** your portrait is taken, look at the photos done by Constantini and decide the angle at which you want your photo taken. Your face must be recognizable in the final piece.

Open your image in Photoshop and color correct and edit as needed. Do NOT distort your selected portrait.

Now, search the internet and find AT LEAST 10 items that you will place in and around your central portrait. DO NOT USE COPYRIGHTED IMAGES!

- Tell a story about yourself with the images you choose - do NOT choose random stuff- make it meaningful
- Use Layers
- Use Layer Masks
- Name your layers!!
- Use Blending Modes
- Overlap images to give the illusion of DEPTH.
- Play with size.
- Do NOT rush this.

Image size: 1000 pixels wide x 1300 pixels high, 300 Pixels/Inch

File format: YourFullName.jpg

Do NOT flatten layers - I need to be able to see them!

Pay close attention to details - they make or break the illusion.

[Links to Objects Photos](#) (the links are on the right side of the page)

For objects, one good source is: PixelSquid.com. If you find what you, make a note of the **EXACT name of the file** and Ms. Durkin will download it for you (she has an account with PixelSquid).
