

Concept

Named for the grit required to polish its surface to a smooth plane, the #3000 Mirror emulates the honed terrazzo floors of Milanese lobbies and Venetian palazzos. Cast in concrete as one piece, its polychrome marble, mirror and aggregate read as a continuous surface.

Form & Function

Attached to the wall with standard picture hanging wire, the mirror can be hung either vertically or horizontally.

Customization

The mirror's size, marble palette and concrete color can be customized. As shown: Red Rosso Levanto, Green Verdi Alpi and Golden Giallo Reale marbles.

Materials

Concrete, Marble, Mirror
