

Allegori

The Focus Clinic
improving student focus and academic performance using data and Neuroscience.

INCREASE FOCUS, MENTAL TOUGHNESS AND STUDENT PERFORMANCE USING NEUROTRAINING.

What is Neurotraining

Neurotraining is the process by which we use EEG to teach students to focus and control their neural activity in order to improve cognitive performance, reduce mental fatigue and improve productivity.

Allegori

Executive Summary

Remember when you were younger? Your parents said, “focus and do your work, child”. The thing is no one taught us how to focus. Sometimes we stared at the pages until something stuck and other times we were in the ‘zone’.

The Focus Clinic, by Allegori, is a service that is geared at students that are preparing for examinations. We help them improve their focus, attention and time engaged in studying while reducing mental fatigue. We have already served students in secondary school and university. We are also helping people prepare for major certification exams like ACCA.

THE PROBLEMS

STUDENTS HAVE DIFFICULTIES FOCUSING AND CANNOT WORK FOR EXTENDED PERIODS.

THEY HAVE CHALLENGES WITH **SOCIAL MEDIA ADDICTION**.

LOW MOTIVATION, IRRITABILITY, ANXIETY AND STRESS.

THE SOLUTION

A DATA DRIVEN PROGRAM FOR IMPROVING FOCUS, MOTIVATION, EFFICIENCY AND PRODUCTIVITY BY TRAINING:

- > SELF-REGULATION,
- > DISTRACTION RESILIENCE
- > SLEEP, MOOD AND STRESS MANAGEMENT
