Digital fuel for logistics

Realise your vision of the future

Tailor-made applications enable you to take advantage of the opportunities offered by digitalization. Such an application will map your business-critical processes, allowing you to manage your digital business and react to events in real time.

Reliable tracking

Track the movement of trucks and others means of transport in real time. You will receive notifications when delays require a rescheduling.
Individual tracking increases your efficiency in loading and unloading.

Efficient personnel deployment

Real-time communication based on location data and notifications accelerates the coordination of decentrally deployed staff.
Assign tasks automatically to those employees who are closest or best suited to a job.

High availability

In the integration of data sources allows you to control maintenance dynamically: Spare parts and the required staff can be allocated as soon as an incident or breakdown occurs.
Reduce your maintenance costs through a smart IT solution.

Satisfied customers

Improve customer satisfaction by keeping them up-to-date in real time through the multi-channel communication.
Happy customers are mostly likely to generate additional business in the future.

Perfect timing

With real-time notifications, you keep track of all journeys at all times. Save valuable time through just-in-time cargo handling and optimize your capacity utilization.
Be able to respond quickly even in the event of unpredictable events.

Smart video surveillance

The digital analysis of CCTV data saves time and personnel costs. Critical situations will be automatically detected and staff intervention can be triggered if need be.
Find out in real time if something unusual happens in your warehouse or with your trucks.

That's digitalisation 2.0

IT-Consulting

One platform, endless possibilities

The high-performance software platform VANTIQ offers an innovative approach for the development of event-driven real-time applications. Its strengths: High availability, human-machine collaboration, a high level of abstraction ("low-code"), security and scalability.
This is the way to take digital transformation to the next level!

1

Practical and efficient
VANTIQ applications are developed based on the events that are decisive for your business-critical processes. The software maps your business - not the other way around.

2

Intuitive usability
With VANTIQ intuitive applications with modern interaction possibilities can be developed. And thanks to its low-code approach, development cycles are nice and short.

3

Distributed Architecture
VANTIQ has a secure, stable backend in the cloud, and of course it supports mobile and edge devices. That way you have access to your data and processes. Anytime. Anywhere.

4

Vantiq connects
Your current IT systems are intelligently linked, not replaced.
VANTIQ can integrate all systems and data that are relevant to you. Of course, this also applies to future data sources.

5

Quickly operational
Thanks to sophisticated cloud technology, you can quickly create tailor-made IT applications that help exactly where you need it most.

6

Secure and flexible
The platform is highly stable and scalable: if your data volume increases, the application adapts automatically. Of course, hosting in your private cloud or "on the edge" is also possible.

Which use case has been giving you sleepless nights?
We would be happy to advise you on how you can digitalise your processes with VANTIQ. Get in touch.
