

Kompuestos shows its latest developments at the VII International Seminar on Biopolymers and Sustainable Composites in Valencia

- **The company will participate as a sponsor in the VII International Seminar on Biopolymers and Sustainable Composites, an important networking event that will take place on March 4th and 5th in Valencia**

Barcelona, March 3, 2020. [Kompuestos](#) (Plásticos Compuestos S.A.), MAB-listed company and leader in the production of sustainable plastic compounds in Europe, will be present at the VII International Seminar on Biopolymers and Sustainable Composites, an event organized by “AIMPLAS Instituto Tecnológico del Plástico” that will take place on March 4th and 5th in Valencia with Kompuestos as a sponsor.

The company will attend this important event with all the information about the latest developments of its different ranges of Exfill® mineral plastic concentrates, Biokomp® compostable resins and biodegradable resins in water Okean™. On the part of Kompuestos, Grégory Coué, R&D Director of Kompuestos; Carlos Duch, Engineering Manager of Biopolymers and Jaume Gómez, Sales Manager of the biodegradable and compostable ranges for the Iberian market will be present at this seminar.

The VII International Seminar on Sustainable Biopolymers and Composites is a great opportunity for the different operators of the bioplastics and composites industry to present their latest developments in a major networking event, which is expected to be attended by more than 150 professionals. The main objective of the seminar is to promote discussion on the new challenges and opportunities for sustainable bioplastics and biocomposites. The event is structured in thematic sessions in which the latest developments in biodegradable plastic materials or those obtained from renewable sources will be presented, as well as success stories from benchmark companies, certifications, environmental impact issues and a full day dedicated to biotechnology.

About Kompuestos

Kompuestos, a listed company in Spanish Alternative Stock Exchange, is a leader in the production of sustainable plastic compounds in Europe. Based in Barcelona, it is one of the leading international suppliers of high-performance compounds aimed at reducing the carbon footprint in the production of plastics, which are used as raw material in multiple industries worldwide.

Kompuestos has developed and certified a complete range of biodegradable products for the replacement of traditional plastics, especially in sensitive applications such as single-use bags and hard-to-recycle products.

The company maintains a strong commitment to the environment. In this sense, it is positioned in favour of the circular economy of plastics and is committed to sustainable innovation by developing biodegradable and compostable products as well as mixtures with minerals that improve the imprint of CO2. The company is developing advanced technologies and plastic recycling additives so that they can be properly reused and the result is not second-rate products and difficult to apply.
