

RELEVANT FACT**PLÁSTICOS COMPUESTOS, S.A.**

9 September 2019

By virtue of the provisions of Article 17 of Regulation (EU) No. 596/2014 on market abuse and Article 227 of the revised text of the Securities Market Law, approved by Royal Legislative Decree 4/2015 of 23 October and related provisions, as well as Circular 6/2018 of the Alternative Stock Market (MAB), we hereby inform you of the following information:

TONS OF PRODUCT SOLD in first quarter 2019 AND ESTIMATED TONS SOLD IN DECEMBER 2019 AND NEW PRODUCT LINE

In the first four months of 2019, Kompuestos has manufactured, as reported in the Informative Document of Incorporation to the Alternative Stock Market (DIIM), 19.4% more than in the same period of the previous year. Sales in tonnes in the first four months of the year have increased by more than 20%.

The company estimates, in the absence of adverse exogenous effects, that total tons sold in fiscal year 2019 will mean a growth of more than 20% in volume over the previous year.

The total sales figure in euros will be linked to the evolution of raw material prices, which are currently estimated to fall. This will mean not so high growth in turnover in euros.

Part of the use of funds from the capital increase implemented in July will be used to start up a new production line dedicated to the manufacture of biodegradable plastics. The location of this new production line will, in principle, be in the current factory in Palau II. If additional space is needed, especially for logistical reasons, the company does not rule out opening a third industrial unit on another site.

We remain at your disposal for any clarification you may require.

In Palau-Solità i Plegamans (Barcelona), on 9 September 2019.
