Cellular C-ITS Corridor

Workshop on GDPR and the EU C-ITS Delegated Regulation
Hossein Zakizadeh – Manager Connected Vehicle Technologies – 2019-05-23

Co-financed by the European Union

Connecting Europe Facility

Reflections on the agenda items

- The long history of the development work and effort in the area of C-ITS
- “Saving the life on road” has been the main driver and priority for vehicle industry to invest in this technology
- The technology is ready for deployment
- EU Commission has taken the responsibility to harmonize and anchor the deployment of this technology in Europe by the Delegated Regulation (DR)
- The main objective of the DR is harmonization and large deployment (which is required for maximum results)
- V2X (ITS-G5) is by design respecting privacy and GDPR already now but we need to make sure that all aspects are completely covered
