Product Description
EZ Dye is extremely easy to use and leaves little to no residual dye on the surface. Use of EZ Dye extends the dye coverage rate, increasing it to up to 1,000 square feet per gallon! EZ Dye should be applied by using an appropriate solvent sprayer with or without a microfiber mop.

Due to the lower evaporation rate of EZ Dye, using a Ameripolish® microfiber mop reduces labor costs and saves time. Use of EZ Dye does not require taping and masking areas in preparation for the dye treatment. Another unique feature of EZ Dye is that it allows concrete dyes to be applied at higher grit levels such as EZ Tool #3 for color enhancement or re-application and refurbishing.

Application Directions
Apply with appropriate solvent sprayer with or without Microfiber mop over concrete.

Features
- Leaves no or very little residual dye on surface saving time on cleaning and dye expense
- Doubles the coverage rate of concrete dyes
- Lower evaporation rate allowing the use of a microfiber mop pad saving time on taping and masking
- Allows concrete dyes to be applied at higher grit levels such as EZ Tool #3 for color enhancement

Storage
Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well ventilated area. Shelf life is indefinite.

Uses
Dying Concrete Floors
