While check-ins are down in August compared to July, COVID-19 isn’t the only reason for this dip. This decrease is also due to more families waiting to register for the fall, and more families registering for later in the calendar year. The majority of members are remaining active with 77.7% back to normal for August compared to 73.9% in July. This is also due to more families waiting to register for the fall, and more families registering for later in the calendar year. Historically, check-ins decrease slightly in September due to back to school. However, the percentage of back to normal has increased from 31.1% in July to 35.5% in August compared to 2019. However, the percentage of back to normal has increased from 31.1% in July to 35.5% in August compared to 2019. However, the percentage of back to normal has increased from 31.1% in July to 35.5% in August compared to 2019. However, the percentage of back to normal has increased from 31.1% in July to 35.5% in August compared to 2019.
