

40th Annual General Meeting BUSINESS DEVELOPMENT MANAGER REPORT

This year has been a busy one for the development of our Snowsport Schools. DSUK has increased availability for snowsport lessons in Scotland by working with Nevis Range and Glencoe mountain resorts. We are all hoping for a better snow season this winter so that we can deliver more lessons and get more of our members out on the mountains.

We are very grateful for the support of the John Apthorp Trust and Britford Bridge Trust who have funded equipment, for all disabilities, for use at these two new locations.

We are excited about the future, continuing to grow and in light of this we are currently in discussion with two new dry slopes regarding opening DSUK ski schools. Fundraising for new equipment and instructor training is a priority going forward.

Safeguarding continues to be one of the main focuses for the charity and we are in the process revisiting all of our policies and training for staff and volunteers.

I'm excited to work alongside the Development Officers to further our support to Local Group volunteers as we work together to ensure high-quality, safe, fun, and consistent delivery of adaptive snowsport locally.
