# ABOUT URBAN TIMETRAVEL

---

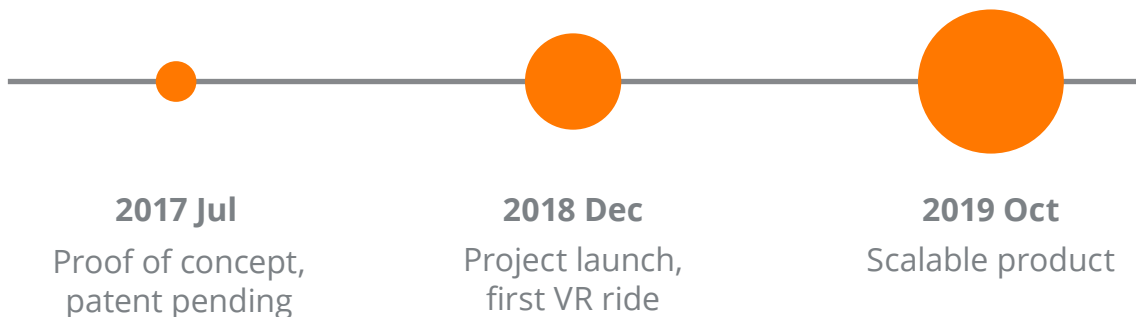

## Urban Timetravel

offers tourists a new way to discover their cultural heritage by traveling through time with the latest technologies Augmented Reality and Virtual Reality.

---

## Milestones

## Our Vision

---

Urban Timetravel enables people to travel in time **anywhere, anyplace, anytime.**

## Our Mission

---

Our Mission is to offer tourists a new way to discover their cultural heritage due to **Cross Reality.**

## **Problem**

.....

It is the biggest human dream to travel in time back and forth. But since we are not able to move our bodies in the fourth dimension we are able to bring our minds into digital spaces.

## **Solutions**

.....

We make timetravel possible due to the latest technologies Augmented Reality (AR) and Virtual Reality (VR).

# **OUR EXPERIENCES**

---

## **Guide**

.....

is an AR-application designed as a guided touristic tour. There are predefined hotspots where the visitor can retrieve additional information like photos, videos on his/her smartphone.

## **Ride**

.....

is a unique VR experience designed as a driving bus tour. The visitor dives completely in a reconstructed virtual world. The synchronization between the real vehicle and the virtual transport completes the immersion.

## **Portal**

.....

is a way to merge Augmented- and mobile Virtual Reality. Using 360° photos and videos to show the user virtual rooms to showcase existing places, exhibition halls or fictional rooms.

## **Capsule**

.....

is the stationary setup of VR content. It can be set up everywhere and is available as a fly-mode or controller-based version.
