APRIL 2019 — PRESENT

I led design efforts of several small visual and ui projects. Working with a business analyst on a recent project, I facilitated stakeholder interviews, created personas and defined the architecture of the website. I often collaborate directly with clients and developers to create effective solutions within tight deadlines.

#### Junior Designer II

SEPTEMBER 2018 — MARCH 2019

Sole designer for two fast-paced projects within the time period, including a brand redesign. I worked closely with one startup to launch a complete redesign of a web-app and it's mobile app companion with a team of international developers.

#### Junior Designer I

JANUARY 2018 — AUGUST 2018

Quickly adjusted to the fast-pace environment, I followed established user flows and design patterns to create visual solutions for several large websites and launched one new website.
