

FAST ROPES

FAST ROPES

Fast or Swarming Ropes are an 8-strand rope designed for rapid helicopter deployments and extractions. The Fast ropes can be interlaced with loops made from

HMPE for transportation and evacuation of personnel. Personnel can clip themselves and their equipment on to the loops for transportation and evacuation.

Applications	Features	Technical	Options
Rapid Personnel Deployment	Excellent soft grip and liquid absorption	Polyester, Nylon or Multifilament Polypropylene	32mm and 400 nominal diameter
Transportation and evacuation of personnel and equipment	Strength not affected by water	8-strand as standard and 12-strand option available	Various end terminations to order
Special Forces	Does not shrink	Fast Ropes can be made to standard: MIL-F-44422	Various lengths as per request
	UV Resistant		Available in Black and Olive Drab green
	Abrasion Resistance		
	Soft eye splice on one end		

Diameter	kg/m (Approx.)	Break Load
32mm	0.6	15,800 kgs
40mm	1.0	17,000 kgs
