

Experience

AB.UXD | Freelance UX/UI Design

February 2019 – Present

While I look for my next UX/UI role, I currently spend my time designing freelance, working in partnership with a developer. I am designing three websites, two portfolios and one for a client starting a small business.

Portfolio Websites: These projects require less strategy and UX thought than an app or full website does, but concern for the user still drives each design. Both projects are single page sites. They involve branding and business card design as well.

Lin'Doula Website: This project is a multi-page website designed to market Linda's doula business and to provide site visitors with an understanding of the services Linda offers. The project includes the ongoing updating and maintenance of the website to keep the content and design current.

Prime Digital Academy | UX Design Student

September 2018 – February 2019

In this immersive bootcamp my UX skills were developed and strengthened by skilled instructors and through real client projects. Prime continues to produce valuable designers and developers to strengthen the tech community in the MSP area and beyond.

Self-Defined Project: *ReadMore Desktop App*

December 13, 2018 – January 14, 2018

In order to address challenges users face managing, sharing, and reading their digital books, I designed the ReadMore Desktop App. This app provides users with digital book consolidation, sharing, and accessibility features. The project required heavy research and design.

Group Project: *Structural*

January 15, 2019 – February 7, 2019

Our team worked for Structural, a Saint Paul startup, to increase data visualizations within their existing software. This project included research, strategy, and design to create and present excellent user-driven features.

Apple | Specialist

September 2014 – Present

Apple has given me many opportunities to grow personally and professionally. My career has been marked by continuous engagement with diverse teams of various sizes and consistent striving to impact my workspaces with my love for organization and communication.

Vantage Point Solutions | Inspector, Resident Project Inspector

May 2012 – December 2016

Working with Vantage Point Solutions afforded me the opportunity to manage a large fiber installation project, oversee construction teams, and maintain numerous reports, all the while reporting back weekly progress to the Vantage Point office two states away. This role reinforced my communication and writing skills, and gave me the opportunity to exhibit daily teamwork to the completion of the project.
