

Holland Premier™ pavers meet the minimum material and physical properties set forth in ASTM C 936, Standard Specification for Interlocking Concrete Paving Units. This includes the following requirements:

- Average compressive strength 8,000 psi (55MPa) with no individual unit under 7,200 psi (50 MPa). **Unilock has a higher minimum standard at 8,500 psi (57 MPa).**
- Average absorption of 5% with no unit greater than 7% when tested according to ASTM C 140. **The Unilock average is 4% with a maximum of 5%.**
- Resistance to 50 freeze-thaw cycles, when tested according to ASTM C 67, with no breakage greater than 1.0% loss in dry weight of any individual unit. This test method shall be conducted not more than 12 months prior to delivery of units.

Holland Premier™ has the classic look of clay pavers, synonymous with the "look and feel" of our architecture heritage. The extremely durable concrete and it's intense color make it an excellent choice for commercial applications.
