Mansfield Town Square at Storrs Center, Mansfield, CT - 14,000 sq.ft.

The Park at Lakeshore East, Chicago, IL - 25,000 sq.ft.

Briarwood Mall, Ann Arbor, MI - 15,000 sq.ft.
The beauty of Series 3000® is up close. This high performance surface features speckles of color, created by the natural granite and quartz aggregates throughout its micro-pebbled surface, bringing class and sophistication to any project.

Using a special two step process, the paver’s surface has a superior exposed aggregate finish that eliminates fading and wear. This non-slip paver is perfect for commercial spaces such as driveways, walkways, plazas, roof decks and much more.

TECHNICAL INFORMATION:
ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units
Conforms to:
• C140 for Absorption and Compressive Strength
• C67 for Freeze-thaw Durability
• C418 for Abrasion Durability
Unilock standards exceed ASTM C 936 with
• 8,500 p.s.i. min.
• 4% absorption avg.
• 5% absorption max.
Test results available upon request.
Typical pour-in-place concrete ranges from approximately 2,500 to 5,500 p.s.i. after 28 days.

LEED INFORMATION:
Potential credits for using Series 3000® slabs include:
• Credit SS 7.1 Heat Island Effect: Non-roof
• Credit MR 4.1 and 4.2 Recycled Content
• Credit MR 5.1 and 5.2 Regional Material

OPPORTUNITIES:
Applications:
• Driveways, patios, sidewalks, plazas
• Soldier courses
• Accents
• Banding
Features:
• Slip-Resistant*
• Efflorescence free
• Modular unit sizes

ARCHITECTURAL FINISHES:
Series 3000® is manufactured with EnduraColor® technology. Using a special two step process, a face mix paver’s top 1/4” to 1/2” has a superior finish that eliminates the appearance of fading.

EnduraColor® Benefits include:
• Higher psi
• Lower water absorption
• No color loss
• Cost effective

Other Unilock EnduraColor™ Pavers and Slabs:
• Premier – smooth finish
• IL Campo – brushed
• Umbriano – smooth mottled
• Belpasso – smooth enhanced
