To Whom It May Concern,

My name is Fernie Fernandez and I am the Assistant Principal of Business and Activities at Santa Fe High school and I am pleased to be writing this letter of reference on behalf of Bryom-Davey, Inc. and their exemplary work for Santa Fe High School's construction project. The Project was a complete demolition and remodel of the school's athletic facilities which was completed in 150 days.

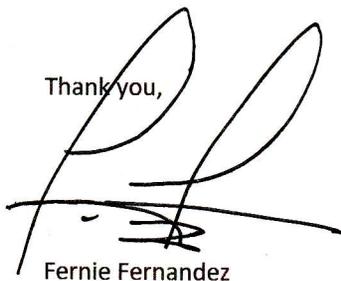

The project manager on this project was Steven Oh and he was extremely easy to work with as were all of the friendly and professional employees at Bryom-Davey. Steven was in constant communication with me on all aspects of this project and provided weekly updates to ensure that I was aware of the progress and any and all circumstances surrounding this project.

Bryom-Davey met all deadlines on or before the due dates which is a truly rare and exceptional accomplishment in construction. As is often the case, things do not always go from paper to construction without any roadblocks or changes. What is quite impressive is that at any roadblock or change, Steven and Bryom-Davey always had options and alternatives to suggest, keeping the project on track.

Compassion is not always associated with construction projects; however Bryom-Davey and its employees took a vested interest in Santa Fe High School as a customer and not just another project. It was refreshing to work with a group that made a concerted effort to go above and beyond the scope of the work. At times there were several construction groups working on our campus and Bryom-Davey worked seamlessly with all groups ensuring a productive and cooperative work environment, which can be quite rare these days.

Ultimately we received excellent communication and customer service, a project that met and exceeded all timelines, and a project manager and company that went above and beyond for us as a customer. I look forward to many more projects with Bryom-Davey and recommend them highly and with no reservations.

Thank you,

Fernie Fernandez
