December 3, 2007

To whom it may concern:

Los Angeles Valley College was extremely fortunate to have had Byrom-Davey as the general contractor for our football/soccer/track stadium renovation project. This project was a very difficult one. A complete rebuild of an existing facility which had been in place for forty five years.

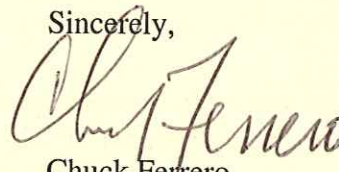

Thus far, this facility has received numerous awards. The new ten lane Mondo surface track has been rated the number one track in California. I have just recently been notified by Mondo USA that the facility has been selected to receive a very prestigious sports facility award. This award will announce in Dallas, Texas next month.

The project was an extremely difficult one. The age of that stadium and its infrastructure presented a difficult challenge. Byrom-Davey, in particular, Steve Davey and Superintendent Dave Jensen came through and solved the problem because of their vast experience in building athletic facilities. Byrom-Davey certainly "saved the day". The commitment to excellence and the congenial guidance made this project a great success.

I have communicated to the numerous athletic directors that have called me about our project. I tell all of those athletic directors, if they have the opportunity to secure by Byrom-Davey as their projects general contractor, do whatever it takes to secure their services as the general contractor. Byrom-Davey solves all of the apparent sometimes insurmountable problems. Their vast experience allows the project to keep moving and finish on time.

The bond program athletic facility construction at Los Angeles Valley College has given me the opportunity to work with numerous general contractors. I will go on record and state, not one of these general contractors is equal to, or even come close to the professionalism, quality of work and friendly service that Byrom-Davey provided Los Angeles Valley College with our stadium/track project.

Sincerely,

Chuck Ferrero
Athletic Director
Los Angeles Valley College
