Dear Mr. Davey,

As you know, last summer Damien High School installed new field turf in our stadium. Once the turf was installed, we realized our decision to go with Byrom Davey was a good one.

The quality of the product, the professionalism of the company and the time frame in expediting the completion of the project was excellent. We have received positive feedback from faculty, staff, parents, and the Damien community throughout the football season. Students participating in football, soccer, and track and field were equally complimentary.

I myself am very happy with the final result of the field turf. It not only enhances Spartan Stadium, it also provides a safe surface for our students to compete on. I highly recommend Byrom Davey to any school interested in upgrading their stadium.

Sincerely,

Patrick Travers
