SPECIAL NOTICE

When choosing an item from the catalogue remember that Tribute is ready to customize any product. We give the architects, retailers and contractors the possibility to personalize each piece for their projects, both individual and commercial, in terms of size, color, and materials. So, please, specify your requests and preferences before making an order, especially when it comes to brass, marble, and fabrics.

The brass details can be ordered with either matte or polished finish. Brass is quite rare, difficult to find and to produce. But when we are done, the result is pure magic: we get exquisite material beautifully reflecting the light. Its main feature is the natural aging process, which makes brass so precious: shiny and bright at the beginning, it becomes matte over time (but can always be polished with the use of special products). Or we can polish it in advance by applying a special finish.

The marble stones presented in the catalogue are the examples of our assortment, so the client has to specify which stone is wanted for us to check its availability. It's impossible to find two stones with the same color or quality - each marble piece is unique. Therefore, the client will be proposed with the range of stones available at the moment, with either matte or polished finish. Remember, that marble is very delicate, and its surface can be easily damaged when not treated carefully. As a natural material, it ages over time, and it's impossible to keep it in brand new state unless you polish it every several years.

The furniture price can be given excluding the fabric - the client can use the material of his own or pick one from our selection of finest fabrics. All the textile, such as cotton, wool, velvets, bouclè, and mélange tweed is 100% made in Italy, uniquely designed and carefully produced by the local artisans and famous factories. By request, the fabrics can be given special technical features such as fireproof and water repellent abilities.
