

Bonfire eSourcing

Bonfire eSourcing is a cloud-based sourcing solution that digitizes more of the sourcing workflow than ever before, empowering teams to run more projects, save more money, and drive better outcomes.

Flexible bid and RFX workflows

Centralize your entire sourcing process online — including price and qualitative evaluations — for smoother collaboration, greater efficiency, and instant auditability.

Industry-leading online evaluation

Collect structured vendor information, provide an easy online experience for your evaluators, and ensure fully-optimized decisions with Bonfire's powerful evaluation tools.

Visual data and reporting

With your procurement data in real-time visual dashboards, you can easily monitor workload, see projects in your pipeline, and report on key metrics.

Easy-to-launch and easy-to-use

Clients are up-and-running within weeks, with no IT resources required. Bonfire's client support team is here to support all users, including vendors and evaluators.

Prepare, Solicit, and Receive Proposals

- Create projects, customize set-up, and collect the right vendor information
- Enforce declarations or mandatory terms and conditions for vendors
- Match and invite vendors, then manage communication and Q&A
- Vendor-friendly online portal: average eight minutes to complete a submission

Compare Proposals and Tabulate Scores

- Create custom weighted scoring criteria to balance the price and non-price factors in your decision
- Simple interface for evaluators to log in and complete scoring
- Evaluation groups to separate and send related evaluation documents and scorecards only to relevant stakeholders
- Automatic score tabulation and consensus reporting

Analyze and Evaluate Proposals

Questionnaires

Collect and effortlessly aggregate vendor data for contextual side-by-side comparison and auto-scoring.

BidTables

Filter supplier data, rank price, sort items, and perform what-if analyses to optimize vendor award.

Reverse Auctions

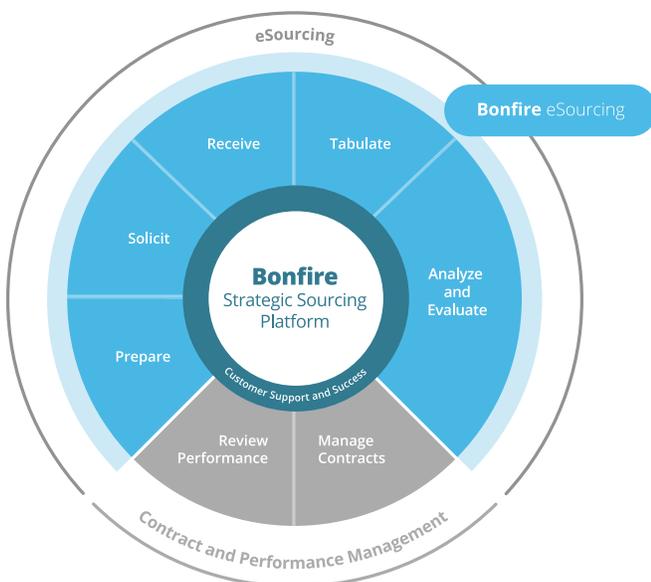

Encourage price competition between shortlisted suppliers with real-time bidding during a defined bidding period.

Multi-Category Decisions

Create parent and child projects to make multiple awards across separate locations or categories.

Insights

View KPIs and dashboards, including cost management, team performance, and cycle times.

Close the loop on your sourcing decisions

The full **Strategic Sourcing Platform** includes additional purpose-built tools to enhance your online evaluation process, unlock more time savings, and put more of your active spend under management.
