

BONFIRE FOR PUBLIC SECTOR

Sourcing software that **works the way you do**

Public procurement teams can no longer afford to manage their competitive bidding and RFx projects through manual processes. Spreadsheets, long group meetings, email, and basic bidding tools waste time, risk compliance, and make it difficult to deliver best value.

Bonfire streamlines your sourcing, contract management, and vendor performance on one cloud-based platform, bringing the right stakeholders together for confident and compliant sourcing decisions.

Why **Bonfire** for the public sector?

Absorb the complexity of compliance

Procurement teams need to be fair and transparent in their sourcing decisions. Bonfire ensures compliance and process adherence with flexible built-in controls and complete audit trails for every step of the decision.

- Collect, store, and auto-expire supplier documentation
- Ensure secure document distribution and management
- Gain visibility over all communication, document views, and actions in the decision
- Instantly export reports for audits, debriefs, and record keeping

Easy-to-learn and easy-to-love

2 weeks or less to implement with no IT resources required

user adoption

World class client support

“We’re able to focus more on the meat of the RFP rather than administering the process. [...]”

Bonfire adds a whole lot of ease to the process.”

-Lacy Parson,
Contract Manager,
Milwaukee County

Save time and streamline the sourcing process

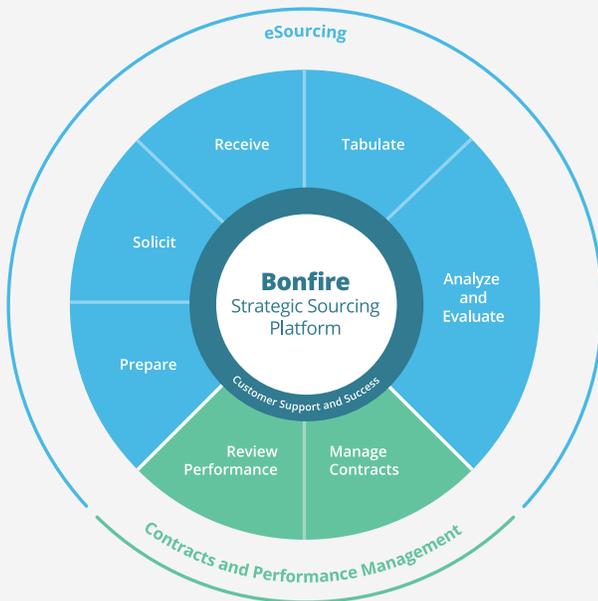

Bonfire centralizes your procurement on a secure online platform, enabling teams run projects in half the time, avoid the costs and frustration of physical submissions, and gain better insight into their purchasing decisions.

- Engage vendors with an easy-to-use vendor registration and submission portal
- View suppliers, project progress, and KPIs within one central dashboard
- Collaborate and communicate with key stakeholders in a single online location
- Save time with automatic data aggregation, score tabulation, and consensus reporting

Drive better value in your sourcing decisions

Bonfire digitizes the complete sourcing lifecycle and contract management, equipping you with deep insights, powerful evaluation capabilities, and proactive performance management tools. Teams using Bonfire see an average of 18% cost savings on their RFPs.

- Expand your supplier reach for greater negotiation power
- Conduct deeper evaluations, with qualitative/quantitative scoring, BAFO, and reverse auctions
- Identify savings opportunities with 360° visibility over spend and project KPIs
- Stay on top of your contracts with key milestones, auto-reminders, and forecasting

eSourcing

- Post opportunities, manage vendor Q&A, and receive submissions online
- Distribute documents to evaluators, then collect and tabulate scores digitally
- Powerful tools to facilitate informed group decision-making
- Award decisions backed by complete audit trails

Contracts and Performance Management

- Store and view contracts on one centralized, searchable platform
- Forecast future procurement needs, set milestones and auto-reminders
- Configure and collect vendor performance surveys
- Monitor vendor performance through clear dashboards

"The specialized capability it brings to the public sector makes Bonfire one of the few modern sourcing solutions that is ready on an out-of-the-box basis for public sector requirements."
