Mouna Khetab, CEO

Client: Born To Be Young
Headquaters: UK, London
Industry: E-Commerce

Born to Be Young –
Turning Online Shop into Social Network

Born to Be Young is an online shop for selling clothes for children. Born to Be Young had all the features typical of modern online shops. However, the owner wanted to get a competitive advantage by developing a unique social network for buyers and integrating the service with existing popular social networks (Facebook, Twitter, etc)

Client's Business Challenges

The client has a developed e-commerce solution for selling children clothes. In addition to standard requirements for an e-commerce application, the customer wanted to add **the following social networks elements** to the application:
- extended options for commenting the goods;
- voting and custom "like" system;
- subscription to updates;
- chatting;
- integration with existing social networks.

Our Solution

The implemented application is based on a popular library for e-commerce solutions - [Spreecommerce](#).

Our team developed a **convenient interactive interface** implementing the social network elements meeting all customer's requirements. Users got an opportunity to interact with other users of the system **without page reload**.

All new functionality and its compatibility with other systems was tested by our QA specialist.

Results

The client received a **collateral e-commerce application** with rich functionality, including elements of a social network (commenting, voting, subscription, chat, etc), making Born to Be Young a **fully functional shop different from the competitors'**.

The application is in the implementation phase. The customer is working on a new design.
