Why Shipping Containers Are Effective

SUSTAINABILITY: Up-cycling 4,500lbs of steel, repurposing an excess product in a practical way

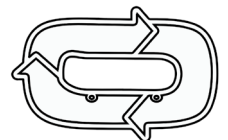

MOBILITY: Move from one place to another allowing for maximum use without typical park restrictions

COST-EFFECTIVE: 15-18% less expensive per square foot when compared to traditional skateboard parks

CONSTRUCTION: 4-week timeline from our building partners at Federal Stone (federalstone.com)

SET UP: Typical parks take months to build but Skatify parks can be set up within an hour

PACK UP: Folding the container up is just as easy. With two people, it takes 30 minutes
