

## EMPOWERING HEALTH CARE PROFESSIONALS WITH A MORE PERSONALIZED AND PRECISE PREVENTATIVE CARE PROGRAM

Tek Partner's Mission is to market our innovative medical software programs and devices, while providing superior quality of care over the current patient metric. Empowering health care professionals with Innovations and Simplicity in Design.

### Tek Partner

#### COMPANY OVERVIEW

Tek Partner was designed with the health care professional in mind. Simplicity in design and innovative programs to provide superior quality over our competition. Tek Partner has fused multiple platforms of preventative programs to create a one of a kind Turn-Key Solution.

Our programs provide health care professionals up-to-date and exciting new software programs to discover new risk factors in patients and provide the necessary reporting and total patient care by combining VANS, AWV, BHI, RPM and CCM.

### BioTek Industry Information

#### CONCEPTUAL FRAMEWORK FOR SYSTEMS SUCH AS BIOTEK

Testing began at the turn of the 19th century with several experiments in basic neurophysiology. These original tests were developed over time into a rigorously defined, standardized series of tests that are useful in the clinical assessment and care of patients with suspected nervous system and cardiovascular disorders. These tests have been widely used in clinical practice for 50 years, with thousands of published peer reviewed studies.

#### TECHNOLOGY ADVANCEMENTS

Although the technology for testing has existed for 50 years, the ability to provide an affordable and mobile platform has only existed for the last 10 years. Previously the technology for testing required large, bulky equipment that was only affordable to large Hospitals. With the advancement of computers and microprocessors, this system has become a subclinical tool that even small physician practices can acquire.

This device is a fully integrated non-invasive platform which performs comprehensive vascular and nervous system assessments.

This device is designed to identify numerous Health Risk Factors at an early stage. See our Biotek Overview for more information!

## WHAT HAS BEEN MISSING?

Tek Partner brings together the information that has been missing. The Tek Partner program has been designed with preventative care in mind for the patient. Tek Partner offers the Annual Wellness Software with built in Chronic Care Management, Behavioral Health Integration, Remote Patient Monitoring and offers the fully integrated non-invasive vascular and nervous system assessment equipment.

Providers and clinicians choose our programs and devices because our markers and scoring systems are simple, intuitive and validated.

Our solutions allow healthcare professionals to gather the fragmented data that has been missing from key risk factor assessments. All the subclinical data and risk factors in real time instantly!

The Tek Partner Solution is the only one of its kind gathering key patient risks from all of our Health Risk Assessments and it has never been easier!

### PREVENTATIVE PROGRAMS

Tek Partner is committed to providing innovative, non-invasive medical software and devices. Our programs include:

- Annual Wellness Visit Software
- Chronic Care Management Software
- Behavioral Health Integration Software
- Remote Patient Monitoring Portal
- Biotek Vascular and Nervous System Device

## ANNUAL PARTNER

### MEDICAL POLICY MANUAL: AWV CMS

Visit to develop or update a personalized prevention plan and perform a health risk assessment.

- Covered once every 12 months
- Patient pays nothing

- **Most recent review date 8/18**

With Tek Partner you will also have access to our Advanced Care Planning Program as well as the IPPE and Subsequent AWV with patient anniversary due dates.

Significantly reduce providers time and maximize reimbursements

- HIPPA Compliant
- Automated HRA
- Show which patients due for the AWV
- Dynamic Checklist to guide Physicians
- Reduce Provider Time
- Generate Claim Reports
- Your own secure, HIPAA- Compliant software portal

## CHRONIC CARE MANAGEMENT AND BEHAVIORAL HEALTH INTEGRATION

Find out why practices choose to simplify their Chronic Care Management and Behavioral Health Program:

- Your own secure, HIPAA-compliant software portal
- Unlimited users and patients
- Live Dashboard showing current CCM minutes
- Patent-pending Guided-interviews for CCM Care Plans
- Task tracker (with timer) and Time Logging
- Monthly Update interface for clinical staff and providers
- Create Care Plan reports for patient and other providers
- Easily download summaries and upload to your EHR
- Integrates with Annual Wellness Visit Software
- Easy Billing interface to easily submit 99490 claims
- Tech Support via email and phone

## BHEAVIORAL HEALTH INTEGRATION

Manage these Behavioral Health Conditions

- Depression
- Anxiety
- Alcohol Abuse
- Substance Abuse
- Mood Disorders

## REMOTE PATIENT MONITORING

As a health care professional, you are constantly striving to provide a better quality of care. Unfortunately, it is difficult to monitor your patients and their health conditions in between visits. In January of 2019, CMS expanded their RPM program to help to further support a health care professional ability to track and monitor their patient conditions through the data transmission of clinical data.

It is simple, a patient shares their numbers with their provider and the clinical staff spends 20 minutes per month, reviewing the patient and clinical data and noting any potential risks and taking necessary action if needed. That's it. It is that simple!

## PATIENT CENTERED CARE MANAGEMENT

Our programs revolve around the quality of care patients can receive the technology healthcare providers need to accomplish this standard of care.

Patient-Centered Care Management in one Program

- Care Coordination
- Health and Wellness
- Transitional Care
- Remote Monitoring
- System Integration
- Time Tracking and Billing
- Non-Invasive
- Vascular and Nervous System BioTek Device
- And Most IMPORTANT – TOTAL PATIENT CARE PROGRAM
