

USER TASK

Austin wants to play music while he's studying. He opens the app and browses for music.

SCREENS TO DESIGN

Home

- Discover More section

- Share the Love section

Music player

- Options menu

- Spotify Bump

HIGH-LEVEL REQUIREMENTS

- Redesign homepage to incorporate two new sections.
 - Design icons, buttons, and modal windows needed for user tasks.
- Place share icon on music player screen.
 - Design a notification that prompts users to share after liking a song.
- Design icon and modal window for Spotify Bump.

DETAILED REQUIREMENTS

HOME

- Discover More section
 - icons/buttons for Radio, curated playlists, user playlists, and Surprise Me
 - Surprise Me button
 - sample screen of Surprise Me result (Radio for a certain album)
- Share the Love section
 - section title and subtitle
 - album/playlist artwork, album/playlist name, and artist name (if album)
 - "share" modal window
 - album/playlist art, name, etc.
 - share entire album/playlist button
 - list of songs, share icon on each song in album/playlist
 - select app from app drawer

MUSIC PLAYER

- Options menu: move share option to top, next to queue (remove shuffle/repeat)
 - design icon that matches other icons
- Bump: design icon and modal window with feature description/instructions
