HMW	How might we create a way where users can send recommendations to their friends?	How might we give users recommendations that better match their interests and mood?	How might we provide a way to display videos that users are more likely to continue watching?	How might we provide a way to display videos that users are more likely to continue watching?
FEATURES	<p><i>Community Page:</i> a page that serves as a feed of recently watched content from people you follow (friends, family, celebrity figures, etc)</p> <p><i>Ratings and reviews:</i> Users can read and write reviews on content, enabling them to view if the content seems interesting enough to them to begin watching in the first place.</p> <p><i>Inbox:</i> users can send connected friends recommended content. Received content will be saved in inbox.</p>	<p><i>Like/dislike:</i> users can like or dislike Netflix's suggestions, resulting in the suggestions remaining or immediately being hidden depending on the respective action and better customizing their recommendations</p> <p><i>Popular in your community:</i> users can view what is popular among those who they follow directly in their feed.</p>	<p><i>Remove:</i> users can have the option to remove shows they do not wish to continue watching from the "Continue Watching" list.</p>	<p><i>Categorization:</i> Redesign the categorization and hierarchy.</p> <p><i>Personalized lists:</i> Include the ability to customize multiple personalized lists.</p>
