

Add Versatility to your Attachment Range

Wedglock **POWERCLAMP™**

A Wedglock PowerClamp fitted to the dipper arm of any machine allows an operator to handle demolition debris, rocks, green waste, forestry logs or any other materials safely and with ease.

Designed to fit as a combination between the Wedglock Quick Coupler and Standard Digging Bucket, the PowerClamp pivots on the main dipper pin.

Specifically matched to both the coupler and the dig bucket, the PowerClamp meshes with the bucket teeth and the wide body and robust construction makes material handling safe, simple and effective.

- **Mounted through the main dipper pin location**
- **Heavy Duty Cylinder, Hardened Main Pin & robust construction**
- **Precise material handling with safety in mind**
- **Toothbar of PowerClamp meshes with bucket teeth throughout the full rotation**
- **Designed to work with either the Wedglock standard coupler or tilting coupler (Long Series).**
