Found between Guadeloupe and Martinique, the lush, unspoiled island of Dominica is the Caribbean's hidden gem. Unexposed to mass tourism, the island attracts both eco-adventurers and those simply wishing to disconnect from everyday life. Surrounded by Cabrits National Park, Cabrits Resort & Spa Kempinski Dominica (https://www.booking.com/hotel/dm/cabrits-resort-amp-spa-kempinski-dominica.en.html?aid=811165&no_rooms=1&group_adults=1&label=news) has been designed to preserve the natural balance between land and the sea, whilst ensuring a modern contemporary guest experience.

Dominica is the land of a variety of flora and fauna, including many rare plants, animals and bird species. The island is protected by an extensive natural park system that encompasses three national parks, two forest reserves and the Syndicate Parrot Reserve. Adventure seekers can enjoy eco-trekking on countless hiking trails, bird watching or simply observing wildlife in their natural surroundings.

Dominica is additionally home to the world's second-largest hot spring and features 365 rivers, one for each day of the year, as well as cascading waterfalls and, of course, breath-taking beaches, ranging from sugar-white to black volcanic sand. With ample coastlines and coral reefs, Dominica also offers world-class diving and snorkelling for underwater adventures that feel out of this world.

All of the resort's 151 luxuriously appointed guestrooms and suites are generously proportioned and guarantee exceptional mountain or ocean views. From deluxe and superior rooms to spacious suites and two-bedroom duplexes, as well as villas, each is inspired by the island's natural beauty and features a soothing palette of coastal colours, detailed wood accents and ample natural lighting, bringing the beauty of the outdoors in.

Rooms are equipped with every modern convenience that a guest might need including flat-screen televisions and complimentary WiFi service to in-room espresso machines and luxurious bath amenities.

For the ultimate Cabrits experience, the 426 sq m Presidential Villa features stunning ocean views, dedicated butler service, a private lobby entrance, two bedrooms, two and a half bathrooms, a dining room, a private spa room with sauna and a large, oversized terrace for outdoor dining,

complete with a grill and private pool. A private chef is also available upon request.

The hideaway striking beachfront location combined with the traditional Creole atmosphere makes it a popular destination for meetings and events, a remarkable stage for unique conferences, and a spectacular backdrop for the most memorable family reunions and special occasions. With more than 2,300 sq m of indoor and outdoor event facilities, there is a space for every occasion including beach, pool and lawn venues, for weddings and celebrations as well as three meeting rooms, a boardroom and an outdoor amphitheatre. The skilled events team provides personalised service to cater to and exceed guests' expectations.
