Vicenza 1:200 Drawings

Vicenza 1:200 Site Plan

1:100 Vicenza Concept Model

Venice Biennale Model

**PROFILE**

I am a 23 year old architecture and urban planning graduate who recently completed five years of studies at the University of Dundee, Scotland achieving a Masters Degree in Architecture with Urban Planning (with distinction). I have previously worked in New York City at Space 4 Architecture and DGJ Architektur in Frankfurt. I am now looking for a graduate architecture and/or urban planning position in practice. I am a strong driven individual who can work well both on my own and as part of a team, being involved in all aspects of the design process. My passion resides in the design of innovative buildings and processes that contribute to the built environment and wider society. I put emphasis on the user experience and the flexibility of space with a focus on adaptability across scales. In line with good practice and my own personal interest I am always searching for solutions when tackling sustainability. I enjoy working alongside clients and other professionals, bringing my enthusiasm to every project while remaining fully engaged throughout.

**SKILLS**
