# Lift 1 EMERGENCY TELEPHONE QUICK PROGRAMMING GUIDE

from mobile phone/landline handset

Follow these steps to set up:

- **Emergency Call Centre Number**
- **Volume**
- **Lift Number, Lift Street Address, City, State**

IF THE PARAMETER IS INVALID, PRESS NUMBERS AGAIN, SLOWLY

1. Ensure that the Emergency phone is connected to active lift telephone line.
2. Dial the Telephone Line number from a mobile phone/landline handset.
3. When the emergency telephone answers press **\*12345\***
4. Enter **011\***
5. Enter Emergency Call Centre contact number
6. Press **\*** (Number will be played back)
7. Enter **111\***
8. Enter **3\***
9. Enter **933\*** (This is the microphone volume setting)
10. Enter **22\***
11. Enter **935\*** ( This is the speaker volume setting)
12. Enter **20\***
13. Enter **872\*** (This is for your own voice recording of the lift site location)
14. Enter **12345\***
15. Wait for high tone sound for 7 seconds followed by a beep to finish, speak immediately
16. Make a voice recording of the **Lift Number, Lift Street Address, City and State**
17. Press **\*** (Your recording will playback automatically)
18. If you're not happy with message & need to record it again go back to Step 13.
19. Enter **875\*11\*** (This enables the recorded message to announce when the call is answered)
20. Press **#** to exit programming mode and quick set up is complete!

When calling the emergency phone, simply press **3** to hear the voice recording announcement of the Lift Address.
