

AT SPOKANE INDUSTRIES, YOU'RE THE BOSS!

Quality Custom from Spokane Industries

For over 30 years, Spokane Industries has worked closely with our customers to build custom fabricated stainless steel tanks that meet your needs and exceed your expectations. Projects as diverse as fish hatchery fingerling transport tanks, to waste-water treatment tanks; from truck chassis mounted potable water tanks to fire tender water transport tanks. All display the wide breadth of experience we have in listening to customer requirements, then engineering and fabricating the very best in stainless steel solutions. We are an ASME and UL accredited shop, certified to build to D.O.T. requirements. We look forward to working with you on your next water tank requirement!

3200 gallon water tank with integrated fenders, commercial chassis mount

JUST A SAMPLE OF OUR CAPABILITIES

One of several fish hatchery fingerling transport tanks we constructed for the Washington State Department of Fisheries.

A water tender tank we built for the Colfax, Washington firedept.

An elliptical potable water tank designed to be mounted on a commercial truck chassis. Built for a California water company. Note the integrated fenders, and rugged rear ladder. The fenders even include pre-drilled holes for the customer's mudflaps. Customize tanks any way you want.

A small wastewater solids removal system, with tanks built by Spokane Industries.

A large tank being loaded for delivery to a customer.

An installation of Spokane Industries wine tanks at a Lodi, California winery. Our vertical water tanks are similar, without the cooling jackets or manways, unless desired, of course.

A square-oval water tank built for District 10 of the Spokane County Fire Department.

A D.O.T highway rated water transport tank built by Spokane Industries.
