

EMPACT® Developer

Transform Virtual Assets Into Immersive Classrooms

EMPACT Developer is a low-code immersive development tool for building high-fidelity, realistic, and fully-interactive immersive environments, assets, models, and simulations.

Key Features and Benefits

Low-Code XR Development

Modular, drag-and-drop framework to visually define UI, logic, and data models.

Built-In Blueprints

Unreal-Powered Software Development Kit (SDK) with pre-configured, standardized, tested, reusable modules and templates.

Cross-Platform & Device Agnostic

Digital foundation for creating XR course ware, deployable to XR/non-XR devices, downloadable and accessible on/offline.

Simplify Immersive Development

Bypass complicated programming to empower technical and non-technical developers.

Visual Modeling

Elevate textual code to visual scripting to fast-track immersive development with greater efficiency, consistency, and scalability.

Expedite Immersive Development

Reduce time and costs of XR development with integrated collaboration tools, revision tracking, and automated processes.
