To whom it may concern,

The YMCA of Greater Toronto purchased duraTRAIN fitness flooring in several facilities.

The product looks amazing in our high end facility and it is performing beyond our expectations. I researched a number of different types of gym flooring before ultimately choosing DuraTRAIN. I found the product itself to be superior.

The company was more than happy to answer all of my detailed questions, sent me sample tiles, and even gave me some references to call. I did call those other gyms and found that everyone was very happy with DuraTRAIN. From the design of the tiles, to the ease of installation, the way that it performs in the gym, to the easy care and maintenance we are extremely satisfied with our purchase. As a fitness club operator, I would have no issues recommending DuraTRAIN fitness flooring to other clubs.

Sincerely,

A handwritten signature in blue ink that reads "Bob Fraser".
