Velotio Technologies is a leading offshore product development company specialising in Digital Strategy & Design, Web & Mobile App Development, Cloud & DevOps, Data Engineering, Generative AI and Media Product Development.

Our team of 325+ highly skilled engineers have built over 110 transformational digital products for global customers including Fortune 500 companies, NASDAQ-listed enterprises and YCombinator, Accel and Sequoia funded startups.

How we can help you

Product Consulting & Strategy

Our team of seasoned product engineers, architects, BAs and UX experts will help you validate the feasibility of your idea and build a MVP, or define a transformation roadmap for an existing product.

[Digital Transformation](#) [Cloud Strategy](#) [Quality Assurance](#)
[Application Architecture](#) [Security Consulting](#)

Experience Design

With our user-centric design approach, we can help you build intuitive digital products with a key focus on rich user experiences [UX] and client experiences [CX] leading to increased customer loyalty and revenues.

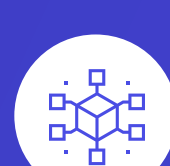

[UI/UX](#)

Web & Mobile App Development

We can help you build high-quality native and hybrid web & mobile apps with cutting-edge technologies, and battle-tested tools.

[React Development](#) [Mobile App Development](#)

Microservices & APIs

With our proven experience of engineering microservices and API platforms, we can enable businesses to accelerate their digital innovation journey

[Backend/Middleware](#)

Cloud & DevOps

We help you leverage the potential of Cloud technologies and architectural approaches for a competitive edge.

Financial Services We Offer

Banking and Asset Management

We foster digital innovation to help banks transition to customer-centric ecosystems that prioritize convenience, 360-degree security, and agility in response to industry changes. We also help them embrace digital opportunities in asset and wealth management, using future-ready platforms.

Insurance

Our cutting-edge digital solutions are designed to eliminate manual processes, increase speed to market, mitigate risk exposure, and improve overall quality while focusing on improving "smart risk" selection.

FinTech Scale-ups

With an in-depth knowledge of blockchain and mobile banking, we enable you to adopt future-ready solutions to expand your revenue model and provide excellent value to customers.

Payment Processing

Modern financial institutions must swiftly embrace cloud, mobile, and contactless technologies in their processing portals. We empower them to meet customer demands for fast processing and stay agile with new payment methods.

Technologies We Use

Loved by clients for a lot more than our technical expertise

Pick who gets to join your team. Request code sample or interview our carefully vetted engineers.

01

Fast-track your hiring with dedicated recruiter and tech leads. Select from pre-screened highly-skilled engineers shortlisted based on your precise requirements.

02

Guaranteed 4-hour overlap with your extended team at Velotio.

03

We build successful, long-term partnerships

Besides tangible outcomes, a huge component of successful partnerships for us is to be a reliable technology partner you can trust. We can quickly setup a team of engineers to accelerate your product roadmap and manage projects in a way that gives you the same level of confidence and peace of mind that you have with your internal teams.

Velotio Technologies holds regular meetinos and uses various project management tools to track progress. The team works hard and is dedicated to the project's success, making them reliable and effective.

Muralidhar Balcha,
Founder & CTO

Working remotely requires a certain level of trust, and Velotio Technologies has undoubtedly earned ours..

Josh Volpert,
Product Manager

We've been impressed with their willingness to be flexible with us.

Beth Crane,
VP Data, Site Machine

I give them two thumbs up! They've been a great partner, especially for end-to-end development projects. We wouldn't be where we are with this project if it wasn't for them.

Sonny Aulakh,
PVP Data, Products,
Solutions & Vertical Marketing

Founded by Serial Entrepreneurs

Our founding team members are serial entrepreneurs who previously founded Clogeny Technologies that later got acquired by one of the most respected cloud computing companies in India. It is their combined experience of **40+ years in the IT services industry and their leadership experience** of handling teams of **300+ members**, which has given us an edge over our competitors. We have processes set of a mature company, and the agility of a start-up that allows us to be more adaptable and transparent to our customers.
