

I'VE TRIED CBD, IT DOESN'T WORK.

YOU'RE RIGHT. WE FOUND OUT WHY.

Bio-availability (bi·o·a·vail·a·bil·i·ty/ˌbīōˌəvāləˈbilədē/)
noun

The proportion of an active ingredient which enters the circulation when introduced into the body and so is able to have an active effect.

Blood Bioavailability

The amount of an active ingredient that reaches the bloodstream.

Functional Bioavailability

The amount of an active ingredient that reaches the bloodstream.

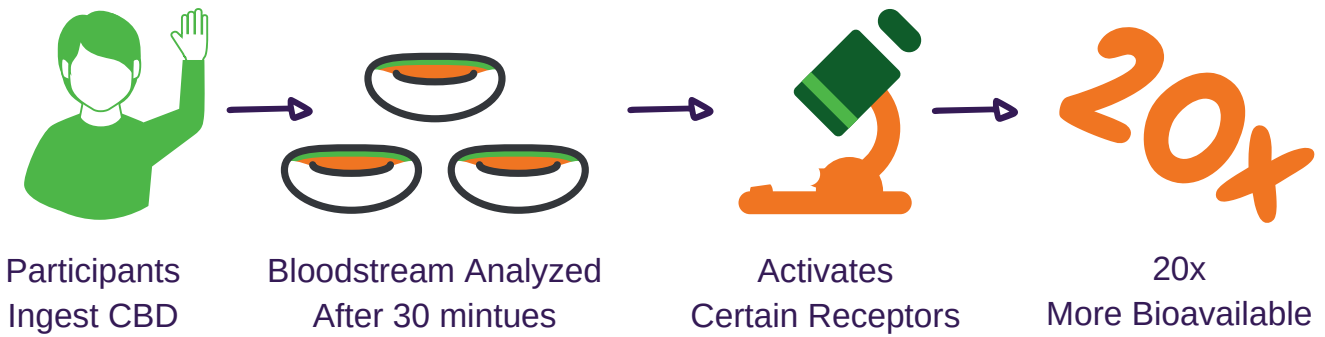

PROBLEM: UP TO 95% OF ORDINARY CBD IS DESTROYED ON IT'S WAT TO THE BLOODSTREAM

Point of Ingestion
100% Available

SOLUTION: BUILD PATENT PROTECTED TECHNOLOGY THAT FOCUSES ON TOTAL BIOAVAILABILITY

HOW WE TESTED THE PATENTED TECHNOLOGY

THE RESULTS ARE IN (AFTER 30 MINUTES)

Conclusion

Graph 1.A
There is typically over 350 ng / ml in 7th Letter Wellness CBD, while competitors CBD contains a mere 30 ng / ml. This means you need 200mg of competitors CBD in order to compete with only 10mg of 7th Letter Wellness CBD.

Graph 1.B
10mg of each CBD was tested to target a certain area of the body. Within 30 minutes 93.3% of 7th Letter Wellness CBD successfully reached the bloodstream, while only 6.7% of competitor's made it in the same duration.
