

We are looking for a high-performing Cost Engineer to join our team. If you have what it takes besides strong academic qualifications, it could be you flourishing in our team culture of empowerment, personal development and fresh thinking.

This position requires a highly motivated individual with extensive experience in cost engineering. The person has the opportunity to build the processes ground up and help the company to achieve the demanding target of penetrating the mass market of two wheelers. The person will form and head the cost engineering department that will closely work with development engineers, department chiefs, project managers and procurement unit.

Responsibilities:

- Join the product development stage with cost estimation and optimization.
- Create files for price calculation.
- Monitor costs in Product development phase based on data from development.
- Monitor costs in Process development phase based on data from manufacturing.
- Monitor costs in Tooling and Equipment based on data from manufacturing.
- Working with suppliers on cost optimization.
- Devising and heading the Cost Reduction Program.

Requirements:

- Experience in the cost engineering field.
- Engineering degree.
- Automotive experience preferred.
- Excellent knowledge of English.
- Ability to work as a project manager within his/her perimeter.
- Highly communicative and collaborative team player.

Advantage:

- Extensive experience in the engineering development.
- Treasurer role in the past within engineering projects.
