

We are looking for high performing Thermal Management Engineer to join our team. The person should have knowledge of fundamental thermal management and design principles and analysis.

The individual should share the passion to engineer the best electric motorcycle in the world. We are constantly looking to innovate and adopt new technologies, so you should be able to embrace constant learning.

Responsibilities:

- Assess and define the thermal management requirements.
- Design elements of the Thermal Management System.
- Development and implementation of the thermal management concept for the battery modules, auxiliary components of the battery modules, power electronics, and power cables.
- Take complete ownership of parts of the thermal management system.
- Assist in the development of manufacturing, integration, and test processes and procedures.

Requirements:

- Degree in Mechanical/Electrical/Physics or related field.
- Fundamental knowledge of thermal management systems and their design principles is required.
- Fundamental knowledge of thermal calculations is required.
- Strong expertise in CAD/Matlab/Simulink.

Send your resume & cover letter to careers@yatrimotorcycles.com and mention 'Application - Job Title' in the subject line.
