yatri motorcycles

We are looking for BOTH Android and iOS developer to join our software development team. The person should have extensive experience in mobile application development and ability to code efficiently.

The individual should share the passion to engineer the best electric motorcycle in the world. We are constantly looking to innovate and adopt new technologies, so you should be able to embrace constant learning.

Responsibilities:

- Development of mobile application for Project Zero and other exciting products.
- Work closely with the design team to implement UI consistent with the brand philosophy.
- Write clean and efficient codes that can be scaled.

Requirements:

- 3 years of experience in software development for Android/iOS.
- Excellent knowledge of architecture patterns and system design (Clean, MVP, MVI, MVVM, VIPER).
- Thorough understanding of security, asynchronous programming, real-time communication.
- Experience with iOS animations.
- Experience with a react native framework.
- Experience in Git version control.

Ideal Engineer:

- Thorough, and committed to doing work driven by excellence.
- Published apps to Play store/App store.
- Gets things done.
- Great sense of responsibility and not afraid to improve things.
- Understanding of automotive industry and trends.
- Fast learner, eager to take on new technologies.

Send your resume & cover letter to careers@yatrimotorcycles.com and mention 'Application - Job Title' in the subject line.
