

# yatri motorcycles

We are looking for high performing Tool Specialist & Equipment Manager to join our team. The person should have experience in servicing and maintaining equipment in a high-volume production line who can also lead and manage different projects.

The individual should share the passion to help produce the best electric motorcycle in the world. We are constantly looking to innovate and adopt new technologies, so you should be able to embrace constant learning.

## Responsibilities:

- Define, implement and manage the tools, machine and equipment using digital solutions.
- Ensure that the production equipment is set up on-time, within scope and within budget.
- Provide operational reliability of production equipment at all time throughout the full life cycle including preventative maintenance activities in line with the calibration cycle.
- Manage internal & external stakeholder, perform risk management & escalate if needed.
- Ensure a proper equipment documentation e.g. safety data sheets and support qualification and training of users.
- Steer the equipment rental and access control process for different departments.
- Establish a live tracking system for any equipment that shows location and other equipment and process relevant information.
- Identify potential problems and perform root cause analysis in case of equipment issues.
- Ensure zero incidents related to FOD (foreign object debris) and lost equipment.
- Develop and support equipment related improvement projects together with manufacturing and engineering.

## Requirements:

- Completed technical apprenticeship, Bachelor of Engineering or equivalent qualification.
- 3+ years of experience in servicing and maintaining equipment in a high-volume production line.
- Proven experience in project management and leading cross-functional projects.
- Experience in end to end maintenance operations, including equipment/machinery and tooling.
- General technical knowledge in machines, tools, other equipment
- Target-oriented, driven work style with analytic problem solving skills required
