

We are looking for high performing Metrology Technician to join our team. The person should have extensive experience in CMM Programming and operation.

The individual should share the passion to engineer the best electric motorcycle in the world. We are constantly looking to innovate and adopt new technologies, so you should be able to embrace constant learning.

Responsibilities:

- Programming and Operating CMM measuring machine and other measuring devices.
- Support in the creation of an inspection environment.
- Create inspection reports in accordance to the measured results on different parts.
- Work cross functionally with related departments (R&D, engineering, manufacturing, QA).
- Assist Prototyping team in the development of parts.

Requirements:

- Educational background as Mechanical Engineer or related field.
- Experience in CMM Programming and operation.
- Excellent knowledge of GD&T and 2D Drawing interpretation.
- Able to propose GD&T modifications and guidelines to reduce manufacturing costs and lead times.
- General knowledge of standard manufacturing methods.
- Great sense of responsibility and work ethics.

Considered as an advantage:

- Experience in quality control.
- Experience with different CMM software.
- Experience in jigs and fixtures design.
- Experience in tooling design of any kind.
- Systematic approach to work.
