

PEACE OF MIND PLAN

The Peace of Mind Plan is designed with three seasonal visits that help keep pests in check throughout the year. Each service helps detect and correct active pests both on the interior and exterior of your home. While most pests are kept in check by the regularly scheduled visits, if pest activity does occur between those visits, you can contact us, and we will return to fix it for no additional charge.

Just Call, and we will take care of it!

Seasonal Preventive Service

Throughout the seasons, we complete inspections and treatments designed to keep ahead of pest activity. We treat safely within your preferences and will return for no charge if pests become a concern.

Service included for most common pests

The Peace of Mind Plan has a broad pest warranty; most pests you might encounter are included. Also, we look for and seal holes that can allow pest entry to occur. Fix it first; that's what we do to make your home pest free and peaceful.

Customized to Your Home

Homes are all different, whether your home is in the bright sun and is attractive to nesting wasps or your home is in the shady woods where spiders are a regular concern, the Peace of Mind Plan will address your home's pest concerns.

Interior and Exterior Warranty and Service

For one annual fee, we provide a program for pests both in and outside of your home. We tailor the service to your specific preferences. "Organic Products" and "Interior Inspection and Monitoring Only" are some common requests.

We look forward to taking care of your pest concerns for you, your family, and the protection of your home. We put pests up a creek without a paddle!

~ Treatment of Meadow Vole is included, but some equipment may need to be purchased

~ Treatment of Norway Rats is included, but some equipment may need to be purchased

Equipment, if needed, is a one time fee for items required to safely treat outside of a structure for creatures like Norway Rats. Tamper Resistant Rodent Bait Stations or other equipment once purchased are the property of the homeowner and typically last many years. We will explain what and why equipment is needed if the need should arise.

We inspect and treat for pests at regular intervals inside and around the immediate exterior of the structure. Courtesy treatment for pest activity further then 10 feet from the structure is at the discretion of Otter Creek Pest Control, Llc. and is dependant on many factors, including but not limited to laws regarding the treatment of certain species of pests away from a structure.

Termites, Wild Animals, and woodboring beetles are not part of the warranty. If a situation should arise with these pests, a quote will be provided. We can offer add-on services for coverage and control of pests not warrantied. Termites, Ticks, Mosquitos, and deer can be controlled through add on programs.
