

One of the greatest challenges our world faces today is health. Strangely enough, the rising cost of healthcare is often linked to diseases that can be prevented. The world is a very intemperate place. People don't put much thought into what they do to their bodies until they begin to see the negative effects on their health. Someone once put it this way, "*We are what we eat.*" Add to that the cities where over-eating is the practice of the day. Because it's sold as food doesn't mean that it should be eaten. Many manufacturers don't warn us about the negative impact of their products because the bottom line is financial gain.

So the question is, in the midst of a capitalistically driven society what can we do to better our health? How can we begin to reverse some of the illnesses and diseases that plague society? Are the answers only found in medication, doctors offices, and hospitals? The good news is God's word has a lot to say about this topic!

It was not God's plan that we should go throughout life struggling from one disease to the next—from one malady to the next. It was never God's plan that we should be a pill-popping society either. And it surely wasn't God's plan that we should eat anything that moves.

If you take the time to study this outline you will see that God's plan is always best. If it is your desire to have a healthy Christian walk then God is calling you today to embrace abundant living.

NOTE: According to the list provided in God's Word lobsters, crabs, all shellfish, swordfish, pigs, rats and mice, catfish, lobsters, clams, shrimp, oysters, eels, frogs, all squirrels, rabbits, horses, dogs, and cats, should all be avoided as food. The key principle is, if it does not have fins and scales in the oceans or rivers, it is not clean for food. If the animal does not have both split hooves and chew its cud it's not to be eaten. God created these creatures as His sanitation department. If you would not eat garbage from a garbage can you should not eat anything unclean. The Bible is God's Owners Manual for His children. Follow it for optimum health.
