

Design Interactive Awarded U.S. Air Force Contract

Ease of use leads to the development of a training specific version of AUGMENTOR for Air Force personnel

Orlando, Florida – April 29, 2019 -- Design Interactive Inc, providers of augmented and virtual reality (AR/VR) training solutions for fleet maintenance personnel, vendors and OEMs, today announced that it has been awarded a contract by the U.S. Air Force to build a training specific version of its AUGMENTOR transportation focused solution.

“We demonstrated AUGMENTOR to multiple stakeholders within the United States Air Force, and after conducting an in-depth feasibility analysis and proposal we were awarded a contract,” said Matt Johnston, division head of commercial solutions for Design Interactive. “Going forward we will be building a training specific version of AUGMENTOR that could reside on their network and be used by training personnel throughout the U.S. Air Force, potentially globally.

“A big factor in winning this contract was the ease of use of AUGMENTOR,” Johnston added. “Augmented reality in general and AUGMENTOR in particular have already had a significant impact in other industries compared to traditional training methods for their ability to provide knowledge in a manner that is effective and productive. Looking ahead, we are going to be able to add features that will continue to meet the needs of enterprise and corporate training departments.”

Design Interactive’s AUGMENTOR transportation focused training solution uses augmented reality and video- and computer-based technologies to more effectively train technicians in the environment where service and repair tasks are performed. AUGMENTOR ensures training consistency by bringing the best solutions onto the shop floor and enabling access to updated content and leads to higher quality and shorter times for vehicle diagnosis and repair processes.

About Design Interactive Inc

Design Interactive Inc (DII) develops and deploys augmented, virtual and mixed reality training and enterprise solutions for the transportation, medical, aerospace, manufacturing, and energy/oil/gas markets as well the military. Design Interactive’s extensive research and development expertise in using augmented and virtual reality technologies delivers innovative solutions that keep people safe, improve efficiency, and achieve optimum performance. Founded in 1988 and based in Orlando, Florida, Design Interactive is a woman-owned business. Visit www.designinteractive.net
