

PRESS RELEASE

Springwood School National Geographic GeoBee

January 29, 2019

Each year thousands of students from across the United States in grades fourth through eighth participate in the National Geographic GeoBee on three levels: school, state and national. The purpose of the National Geographic GeoBee is to spark student interest in geography.

Springwood School held their annual school GeoBee on Friday, January 25, 2019. The first place winner was Hayden Wolfe, an eighth grade student at Springwood School. The second place Springwood School GeoBee winner was Makenzie Sims, who is currently in fifth grade at Springwood School. This is Hayden Wolfe's second first-place win in the GeoBee, as he also took first place last year. Hayden will now participate in the online state qualifying eligibility round.

Mrs. Pam Wood, Springwood School GeoBee Sponsor, stated, "We are proud of Hayden and Makenzie. We know Hayden will represent Springwood well at the next level and we are excited that he has this opportunity."
