

## Innovu's groundbreaking Pharmacy Program Analysis helps advisors and employers identify crucial cost savings within an ever-growing pharmacy spend

- ✔ Improve employee satisfaction by offering an affordable benefit through better management of your pharmacy programs
- ✔ Reduce the risk of over-utilizing wasteful, high cost drugs by leveraging data analytics
- ✔ Take control of your contract terms to obtain the data you need to make informed procurement decisions

Innovu's PPA is a one-of-a-kind pharmacy analysis that pinpoints savings within several critical areas of an employer's drug spend:

### WASTEFUL SPENDING

- ✔ Measure wasteful spending on higher priced drugs that have no proven incremental clinical value over lower priced drug alternatives
- ✔ Compare your volume of spending to other employers to set a goal for eliminating waste
- ✔ Identify actionable examples to engage your PBM on interventions

### DRUG DEFINITIONS

- ✔ Learn the impact of contractual drug definitions when reconciling your contract pricing
- ✔ Identify how your prescriptions are classified to reduce the risk of under collecting on drug pricing guarantees
- ✔ Compare your drug definitions to other employers and engage your PBM to identify potential savings opportunities

### DRUG INDICATORS

- ✔ Identify gaps in your claims data due to the omission of critical drug indicators
- ✔ Improve your ability to monitor specialty drug utilization
- ✔ Lead successful conversations with PBMs about the use of claims data indicators to monitor overall program performance

### MANAGEMENT PROGRAMS

- ✔ Compare your utilization of prescription drug classes to other employers
- ✔ Measure the over or underutilization of prescription drugs
- ✔ Formulate data driven questions to research management opportunities with your PBM
